Outdoor Agreement granted by Ministry of Defence and National Police

The Ministry of Defense and the National Police of the Netherlands, after conducting a European tender procedure, have granted a framework agreement for Outdoor equipment to the consortium LV Equipment BV (LV) and it's sister company Spac Sport BV (Spac). The agreement has a duration of 4 years plus 2 option years and covers the supply of specific individual (combat) equipment.

The uniqueness of the contract allows units and individuals quick access to equipment and freedom of choice as well as providing significant timesavings when compared to traditional procurement procedures.

The contract is a unique highly flexible vehicle for immediate support of worldwide operations. Units and individuals will be getting the equipment they want or customized products in case a standard product is not available.

Both LV and Spac are convinced that this agreement will be hugely succesfull. The blend of LV, experienced in development and production of combat equipment and Spac, a high end outdoor retailer with its main store in Nijmegen, is a great platform to equip both units and indivi-duals. On top of that the web shop operated by Spac provides a separate section with specific products accessible by assigned military & police staff only.

The outdoor-contract is a new way of procuring off the shelf equipment to adapt to rapidly changing threats and areas of operation.
